VISIT OUR WEBSITE!
New Space Economy ExpoForum is the international exhibition and conference, organized by Fiera Roma and Fondazione E. Amaldi, focused on the capacity of the new space economy in enabling new terrestrial markets based on entrepreneurial-driven space innovation.

Building upon the success of our previous editions, we are proud to announce that in the 5th edition of NSE ExpoForum we will bring together new visionaries, innovators, and industry leaders from around the world under the one roof of Fiera Roma.

Forge strategic partnerships, embrace the power of game-changing ideas and cutting-edge space technologies, cultivate newspace connections and explore potential collaborations with like-minded professionals, VC investors, and decision-makers.

- B2B AND B2G
- DEDICATED NETWORKING PROGRAMS
- THEME EVENTS
- COMPETITIONS AND CHALLENGES
OUR 2023 MANIFESTO
TOWARDS SPACE RENAISSANCE

OVERCOMING LIMITS AND BARRIERS

Knowledge and self-doubt. Courage and calculation. Dream and project.

Opposites that live in our souls, but for some of us they become excellence, they become a life mission.

Boundaries become goals, barriers become springboards.

European excellence, whose roots lie in the Renaissance values of art and science, humanism and willpower, now faces new challenges and new barriers.

BEYOND CURRENT BUSINESS MODELS

Challenges and barriers made of a rarified atmosphere, a vanishing gravity, infinite spaces and deafening silences, but what does not change is the approach that leads to achieving such goals.

The eclectic, ingenious vision full of cross-contamination, curiosity, and courage that has accompanied Italian and European genius for centuries must remain.

TECHNOLOGY TRANSFER IS THE KEY

NSE ExpoForum turns the gaze of such genius upward, toward space, toward a new adventure where new successes can be written.

These successes, as it was during the Renaissance, will stem from the ability to bring together sensibilities that are distant for others: we must contaminate fields, let different sectors speak to each other, gently force a dialogue between non-adjacent areas.

This is what we mean by “technology transfer”.

SPACE HUMANISM

NSE ExpoForum wants all of the above: our event tackles both excellence and diversity, our event wants both ambition and control.

NSE ExpoForum is the place where the eclecticism of the European excellence meets up and tells its story: NSE ExpoForum is the moment in which new market opportunities arise from cross-contamination and competences.
THE REASON
SPACE COMPANIES
WHY PARTICIPATE

THE VALUE
YOU CAN GIVE US

Today you are the enablers of transformation, of the technological innovation that is already affecting every aspect of daily life, from culture to business models.

You represent the highest level of cutting-edge science and technology, in all its regional facets.

As representatives of excellence, you are adept at generating and delivering novel technological, cultural and scientific experiences that excite your stakeholders.

THE VALUE
WE CAN GIVE YOU

This is not a space expo as you are used to imagining it.

NSE ExpoForum is a gathering place that aims to involve the major leaders of the space industry, from Europe and beyond.

We will give you the opportunity to come into direct contact with companies operating in extra-Space sectors, which will give you the inspiration to find simple and applicable solutions to their business sectors.

Here you will have the opportunity to meet institutional stakeholders, peers and competing companies to maximize the value of your solutions.
THE VALUE
WE CAN GIVE YOU

Space is a complex field that needs a well-established scientific and technological background: therefore, NSE ExpoForum allows you to interact directly with space companies, building valuable relationships and partnerships for your business.

NSE ExpoForum is the event that encapsulates every facet of the industry that more than any other today has become an enabler of the technological and industrial transformation of the future.

You can enjoy an experience that will shed light on what Space has to offer for your business.

THE VALUE
YOU CAN GIVE US

You represent a wealth in terms of business models and in understanding the needs expressed by people.

What will really spark the New Space Economy are the needs you will have extrapolated from the marketplace: Space is ready to provide you with the best solution to meet the needs you convey.

You give us the opportunity to build solutions that will ground the roadmap of technological and scientific development in the coming decades.

THE REASON
NON-SPACE COMPANIES
WHY PARTICIPATE
The structure of Fiera Roma is extremely flexible and versatile, suited to every need. The large pavilions are connected by a 6-metre high walkway, which allows easy access.

**Fiera Roma** has an industrial organization focused on internationalization, benefitting from:

- **Strategic Geographic Position**
- **Excellent Fittings**
- **Large Exhibition Area**
  - 450,000 sqm gross outdoor surface
  - 9 Pavilions (single-storey halls without pillars)
  - 13 meeting rooms in Convention Center Hall
- **Vanguard Technology for high-speed fiber optic connectivity**, 10,000 simultaneously available wi-fi connections within each hall
- **70 Events organized every year**
